IN HUB MARKETS

Quotations on the Leading Products In Demand

Boston, March 21.-There is a slightly easier feeling in the butter market, and buyers are operating very cautiousiy, as they have no confidence that present prices are to be maintained indefinitely. Prices, however, are not yet quotably lower: Choice northern creamery, 32@33c; western creamery,

31@32c; Vermont dairy, 26@28c. There is a very firm market for cheese, as the market is well cleaned up, especially for choice lots. York state, 143-4@15c; Vermont, 14@14%c.

Eggs are steady, the net decline for the week being 2@4c. The quotations are: Choice hennery and nearby, 23@ 24c; eastern extras, 20@21c; western,

The week has been a much better one in the local fruit and vegetable market than the one that preceded it; the improvement has been noticeable in fruits than in vegetables. The weather has permitted shipments to the country with perfect safety, and since the retailers have been able to make a greater display of their goods, they have sold more goods. Some products are a little cheaper than they were a week ago, but in general the market is still very firm.

The demand for apples has not been very sharp. Fancy fruit has been taken fairly well, and lately there has been cuite a good call from street hawkers for medium-priced stock. Cranberries are steady, but are not moving very fast. Strawberries are in fairly good supply, and choice lots have a ready sale at 407/45c; soft berries bring 20/030c.

Potatoes have been coming forward freely and receivers are urging sales at somewwhat lower prices. Sweet potatoes are not much called for, but the supplies are small and prices are firm. California asparagus is now in the market, but at the high prices asked the demand is not large. Cabbages are plenty, dull and easy. Tender string beans bring good prices, but there are very few such lots. All kinds of greens have been in light supply and firm. Lettuce is easy, and onions are not as firm as they were. Squashes, tomatoes and turnips are steady. Celery has gone up a little. Peppers and eggplants are lower, but rhubarb is higher.

Apples-Kings, \$2.50@3.50 a barrel; Ben Davis, western, \$2@3; eastern, \$1.75@2.50; northern spies, \$2@3; No. 1 Baldwins, fresh arrivals, \$2@3; cold storage, \$2.50@3.25; mixed Baldwins, \$1.75@2.25; No. 2 Baldwins, \$1.50@1.75; greenings, fresh arrivals, \$2@2.50; cold storage, \$2.50@3; Talman sweets, \$2@ 3; nodheads, \$2@3; russets, \$1.50@ 2.50; box fruit, 50c@\$1.25.

Cranberries-Cape Cod fancy. \$8@9 a barrel: good to choice, \$6.50@7.50: crates, \$2.506t3.

Strawberries-Florida, 20@45c a Potatoes-Aroostook Green moun-

tains, 56/a58c a bushel; hebrons, 53c; sweet potatoes, Vinelands, \$3.25@3.75 a barrel and \$1.25@1.37% a basket. Cabbages--Drumheads, \$1.50@1.75 a

barrel; savoy, \$1.50 a barrel. Celery-White, \$1.50@2 a dozer

bunches; paschal, \$3,50.

Greens-Spinach, \$2.25@2.50 a barrel; kale, \$1.50 a barrel; dandelions. \$1.50@1.021/2 a bushel; beet greens, 75e@

Lettuce, etc-Lettuce, 25@50c a doz en heads: romaine, \$1; escarole, 750@ \$1; chicory, 75e@\$1; mint, 50c a dozen A. P. BEAN, A. E. ANDERSON, | Com'rs. bunches; watercress, 3712@60c; parsley \$1 a bushel.

Onions-Native, \$1.25@1.50 a bushel; Cuban Bermudas, \$363.50 a crate; Spanish, \$3,50@4 a crate; leeks, 60@75c dozen bunches.

Souashes-Marrow, \$2 a barrel; hubbard, \$30040 a ton.

Tomatoes-Hothouse. 60@70c a lb: southern, \$3663.50 a crate.

Turnips-Yellow, \$1.25@1.50 a barrel: French white, \$1@1.50 a bag; white eggs and flats, 50@75c a bushel.

Miscellaneous-California asparagus, \$6610 a dozen bunches; cucumbers, \$4610 a box: carrots, 85ca\$1 a bushel; parsnips, \$1@1.25 a bushel; radishes, \$1@1.50 a box; beets, 60@75c a bushel; peppers, \$2.50 a crate; eggplants, \$3@3.50 a crate; oyster plants, \$1.50 a dozen bunches; okra, \$3 a crate; California cauliflowers, \$3674 a crate; artichokes, \$2.50@3 a bushel; hothouse

All backs and clears in barrel pork were marked off and raw leaf lard was also lower, but briskets were advanced

Fresh beef is steady in price, though trade is dull and only a few choice cattle will bring top prices. Extra sides. heavy, 8@84c; good, 74@8c; light, 7@ 74e; heavy hinds, 10@104e; good, 93.4 @10c; light, 9@91/2c; heavy fores, 6@

646c; good, 5466c; light, 5654. Lambs cleaned up well. Veals are firm for good lots. Spring lambs, 100 114c: yearlings, 7@Sc; mutton, 7@Sc;

veals, 10@12e; faney, 13c. Poultry has been in lighter receipt. and there is a better market for fresh arrivals, but the market as a whole is still quiet. The demand is especially good for choice northern broilers, which are scarce, and fresh killed northern fowls and chickens are selling well. Western turkeys, 17@19c; native broiler chickens, 2-1b, 306632c; northern reasting chickens. 18@22c; fowls. 15@16c; western broilers, 18620c; western chickens, 13@15c; fowls, 14@15c;

geese, 11@13c; ducks, 12@14c. Hay is scarce for choice lots, but low grades are draggy and hard to sell, holders being disposed to shade prices to move stock. Straw is barely steady. Millfeed is very firm, with a fair demand. Hay. choice, \$23; No. 4, \$22; lower grades, \$14@21; rye straw, \$13@ 14; sat straw, \$9@10.

OUR FARMERS.

MAPLE SUGAR.

The following is the substance of a paper read at the last meeting of the Vermont Sugar Makers' Association by Dudley Carleton of West Newbury,

There can be no fast or hard rule laid down in sugar making that will apply in all cases, and there are always points for discussion which are of assistance to some one. Only a small proportion of the sugar makers of the state attend these meetings and it is largely the ones who remain away that need the most instruction in the process of sugar making.

We certainly have not brought this industry to perfection, although the meetings of our association have done much to improve methods.

The manufacture of high grade maple goods must begin when you install your plant. Do not be cajoled into buying an evaporator. It is essential that the bucket should be of tin with covers, and the spouts, gathering tubs and storage tanks should be of metal.

The next step is in tapping the trees. Much depends on the way this is done. The hole should be bored in a healthy part of the tree, not in line with the tapping of other years, as sugar of the best quality cannot be made from colored wood.

The sap should not be allowed to remain in the buckets very long and should be kept as cold as possible until placed in the evaporator.

In order to produce the best article shallow and quick boiling pans are necessary. I also believe in straining the syrup cold, letting the lime settle by itself and keeping it out of the

It is almost impossible to strain it hot and not have some forced through the strainer, that will show in a high grade strainer.

We can and ought to put up maple sugar without guesswork by using a

If the consumer or buyer calls for a cheaper article he can usually get it as considerable is necessarily made before the season closes. I think too much is laid at the door of the mixer. The fact is that all grades are

pretty thoroughly mixed before they leave some of the producers' hands. After all quality is the main consideration. The prices paid for the

best article will more than repay the producer for the care taken in its production. It costs no more to keep a cow that will produce 15 or 20 pounds of butter

per week than it does one that will give us only eight or nine pounds, and this is practically true in the manufacture of maple sugar. The grading of syrup and sugar is

of much importance also. If properly graded the producer can realize more from his crop and give better satisfaction to his customers and at the market.

"The Man Behind" after all is the prime consideration in sugar making. First he should be strictly honest, who will give 11 pounds for a gallon of syrup and not 10 or 1016.

The state of Vermont headed the list of states in the production of maple products for many years, now it has dropped to third, New York and Ohio being in the lead. The causes are numerous, our seasons, the maple worm, the labor problem and the manufacture of a poor quality of sugar being the greatest.

"I think a corporation sugar house would pay in certain sections of the state. I believe it would improve and make more uniform the sugar.

"It is estimated that there is between \$100,000 and \$200,000 lost in the state by careless manufacture of sugar. Let us consider these things carefully in the future."

Another paper read at this meeting was by P. B. B. Northrup of Sheldon upon "Producing Maple Sugar for Profit." He gave three things as necessary to this end: Reduce the cost of producing it to a minimum; make goods of the finest quality and particulars.

sell them at the highest market price. In detail there should be an orchard of some size and the best results are found with one where the trees have a southern exposure. The trees should not be too close together. There should be plenty of storage vats for sap as it is gathered. The sap should be gathered as soon as the buckets have a quart of sap in them and when delivered to the boiling place it should be strained. The sap should be boiled into standard syrup before being drawn from the separator. It should be then run through | bottle at less than cost of postage filters, and immediately canned and and packing! sealed, the temperature not falling below 110 degrees. I would advise selling the product in the syrup instead of making it into sugar.

Maple Sugar and the Pure Food Act.

Makers' association.

It was a dicussion upon the National Pure Food law and Vermont Maple | Chicago. Sugar Industry. The intent of the law was outlined at some length and Barton Landing.

its application of the standard of maple sugar.

The two great purposes of the Food and Drug act are to "prevent misbranding and prohibit adulteration." The act does not prohibit the manufacture and sale of adulterated food when not deleterious to health, but firmly and emphatically insists that the value of all such admixtures be plainly indicated on the label or otherwise, so that customers will

what they want. This national law affects only interstate commerce and does not conflict with the sundry state laws. When the retailer sells to the public the goods must conform to that special state law.

have the privilege of buying just

In the national law the term original package is defined as any recepacle put up by the manufacturer to which a label is or can be attached, making one complete package. It includes both wholesale and retail packages.

Pure goods do not have to be labelled, although many of them doubtless will be. Goods marked pure which

are not pure are against the law. The new law and drug act requires that all goods conform to the standards formulated by the secretary of agriculture. The standards are based on goods made under American conditions. The limits fixed are not of necessity the extremes on record.

The time in which to work off stock and labels on hand and in use prior to January 1, 1907, has already been extended to October 1907. It appears to be the desire of the government to abolish chemical preservatives, particularly borax and boric acid, benzoids of soda, formalin and salicylic acid, and allow only harmless colors and flavors.

Maple sugar is defined as the solid product resulting from the evaporation of maple sap and containing in the water free substance not less than 0.65 per cent of maple sugar ash. Maple syrup is syrup made by the evaporation of maple sap or by the solution of maple concrete, and contains not more than 32 per cent of water and not less than 0.45 per cent of maple syrup ash.

In closing let me urge that the sugar makers make more syrup and less sugar than at present.

It Pays to Use Fertilizing Sale. Those who have used Salt on light. sandy or worn-out soils are almost unanimous in the opinion that it is the cheapest and best fertilizer that they can use on this kind of land, especially for oats. The application of from 600 lbs. to 1000 lbs. per acre is said to more than double the crop. Salt is also excellent as a weed killer. The Vermont Experiment Station especially recommends it for killing Paint Brush on grass land. C. S. Page, Hyde Park, Vt., sells a very desirable Salt for fertilizing purposes, put up in cheap 100pound sacks, for the very low price of \$3.50 per ton, free on board cars at Hyde Park. This price is considerably less than that for which ordinary Salt can be bought and this Salt contains considerable matter that adds to its fertilizing valua. The freight rates to points between Lunenberg and Swanton and Newport and White River Jet. are very low on this material, especially in 12 ton lots. Write for full
